7. Staff

The total number of employees of the Company as of December 31, 2025 is 53 people.

8. Statement on Comparability of Information in Financial

Comparative information is presented based on figures from the Consolidated Financial Statements for quarter 4 of 2024.

II. FISCAL YEAR, CURRENCY USED IN ACCOUNTING

1. Annual accounting period: According to the calendar year, starting from January 1 and ending on December 31.

2. Currency used in accounting

The currency used in accounting is Vietnamese Dong (VND).

III. ACCOUNTING STANDARDS AND REGIMES APPLIED

1. Applicable accounting regime

The Company applies the Vietnamese Enterprise Accounting Regime issued with Circular 200/2014/TT-BTC dated December 22, 2014.

The financial statements have been prepared on the historical cost basis and in accordance with Vietnamese Accounting Standards. The accompanying financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than Vietnam.

2. Statement on Compliance with Accounting Standards and

The Board of Directors of the Company ensures that the financial statements have been prepared and presented in compliance with the requirements of Vietnamese Accounting Standards, the current Vietnamese Enterprise Accounting System and relevant guidance documents on the preparation and presentation of consolidated financial statements.

IV. ACCOUNTING POLICIES APPLIED

1. Basis of financial statement consolidation

CONSOLIDATED NOTES TO FINANCIAL STATEMENTS

The consolidated financial statements are prepared on the basis of consolidating the financial statements of the parent company and subsidiaries controlled by the Company as at December 31, 2025, in accordance with Vietnamese Accounting Standards. The accompanying consolidated financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than Vietnam.

Subsidiaries are fully consolidated from the date of acquisition, being the date on which the Company obtains control, and continue to be consolidated until the date the Company ceases to control the subsidiary.

The financial statements of the parent company and its subsidiaries used for consolidation are prepared for the same accounting period and apply consistent accounting policies. Where necessary, adjustments are made to the financial statements of subsidiaries to ensure consistency with the accounting policies applied by the Company. Intra-group transactions, liabilities and unrealized gains and losses arising from intra-group transactions are eliminated in full when consolidating the financial statements.

Non-controlling interest

Non-controlling interests consist of the amount of the non-controlling interests at the date of the original business combination and the non-controlling interests' share of changes in equity since the date of the combination. Losses applicable to the non-controlling interests in excess of the non-controlling interests' interest in the subsidiary's equity are allocated against the Company's interest except to the extent that the non-controlling interests have a binding obligation and are able to make an additional investment to cover the losses.

An associate is an entity in which the Company has significant influence and that is neither a subsidiary nor a joint venture of the Company. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

Investments in associates over which the Company has significant influence are accounted for under the equity method. Interests in associates are presented in the consolidated balance sheet at cost adjusted for changes in the Company's share of the net assets of the associate after the date of acquisition. Losses of an associate in excess of the Company's interest in that associate are not recognised. Other distributions are considered as recoveries of investments and are deducted from the investment value.

2. Types of exchange rates applied in accounting

Commercial bank whose exchange rate the Company chooses to apply in accounting: Transactions at which commercial bank will use the exchange rate of that commercial bank.

Types of exchange rates applied when recording transactions

- Actual exchange rate at the time of transaction:

Used to convert to accounting currency for transactions recorded as increases: Goods, prepayments to vendors, payables.

In case of selling goods or providing services related to revenue received in advance or advance payment from the buyer: Revenue and income corresponding to the amount received in advance shall be applied the actual transaction exchange rate at the time of advance payment from the buyer.

- Actual exchange rate at the time of transaction:

Used to convert into accounting currency for transactions recorded as reductions: Accounts payable, Advance payments to sellers due to receipt of products and goods.

In case during a period there are many receivables or payables in foreign currency with the same entity, the actual recorded exchange rate for each entity is determined based on the moving weighted average of transactions with that entity.

- Actual exchange rate at the time of transaction:

Used to convert to the accounting currency on the credit side of cash accounts when making payments in foreign currency.

3. Principles of recording cash and cash equivalents

Cash and cash equivalents include: cash, demand deposits and deposits with maturity of less than 03 months, cash in transit and short-term investments with maturity of no more than 03 months from the date of investment, which can be easily converted into a certain amount of cash and have no risk of conversion into cash at the time of reporting. The determination of cash equivalents is ensured according to the provisions of Vietnamese Accounting Standard No. 24 "Cash Flow Statement".

4. Principles of accounting for financial investments

Investment in associates

CONSOLIDATED NOTES TO FINANCIAL STATEMENTS

Principles for determining joint ventures and associates: Based on voting rights ratio.

Carrying value of investment in associate: Carrying value of investment in associate is determined using the equity method.

Accounting method for stock dividends: stock dividends only track the number of additional shares on the financial statement notes, do not record the value of shares received, do not record financial revenue, do not record the increase in investment value.

5. Principles of accounting for receivables

The classification of receivables as trade receivables and other receivables is carried out according to the following principles:

- Trade receivables: Includes commercial receivables arising from purchase and sale transactions.
- Other receivables: Including non-commercial receivables, not related to purchase and sale transactions (such as: receivables from loan interest, deposits, dividends and shared profits; payments on behalf of third parties that are entitled to be received back; receivables from fines, compensation, missing assets awaiting resolution, etc.).

Trade receivables

Receivables are tracked in detail by original maturity, remaining maturity at the reporting date, by original currency and by each Receivables that meet the definition of foreign currency monetary items: Revalued at December 31, 2025 at the actual exchange rate at the end of the period (see also Note IV.2).

Receivables are recorded at no more than recoverable amount.

Method of establishing provision for doubtful debts

- The allowance for doubtful debts represents the portion of receivables that the Company expects to be uncollectible at the end of the financial year. Increases or decreases to the allowance account balance are recorded in administrative expenses during the period.
- Receivables overdue for 6 months or more (overdue period is determined based on the original purchase and sale contract, not taking into account debt extension between the parties) are provisioned at the following rate:

<i>Overdue time</i>	<i>Provisioning ratio</i>
From over 6 months to under 1 year	30%
From 1 year to less than 2 years	50%
From 2 years to less than 3 years	70%
3 years or more	100%

6. Principles of inventory recognition

Inventories are determined on the basis of the lower price between the original cost and the net realizable value. The determination is carried out according to the provisions of Accounting Standard No. 02- "Inventories", specifically: The original price of inventories includes: Purchase costs, processing costs and other directly related costs incurred to obtain the inventories at the current location and condition. Net realizable value is determined by the estimated selling price minus (-) the estimated cost to complete the product and the estimated costs necessary for consumption.

Inventory valuation method: Weighted average.

Inventory accounting method: Perpetual.

Method for determining the cost of unfinished business production at the end of the period:

The cost of unfinished production at the end of the period is determined by the Company by the total cost of direct labor and general production costs.

Method of setting up inventory price reduction provision: Provision for inventory impairment is created for the estimated loss arising due to impairment (through diminution, damage, obsolescence, etc.) of raw materials, finished goods, and merchandise inventories owned by the Company, based on appropriate evidence of impairment at the balance sheet date. Increases or decreases in the provision balance are recorded in cost of goods sold during the period.

7. Accounting and depreciation principles for fixed assets and financial lease fixed assets

a) Accounting principles for tangible and intangible fixed assets

CONSOLIDATED NOTES TO FINANCIAL STATEMENTS

Tangible fixed assets

Fixed assets are stated at original cost minus accumulated depreciation.

The original cost of fixed assets is the total cost that the Company must spend to have the fixed assets up to the time the assets are put into a state of readiness for use. Determining the original cost of fixed assets for each type is in accordance with Vietnamese Accounting Standard No. 03 on tangible fixed assets.

Expenditures incurred after initial recognition (upgrade, renovation, maintenance, repair costs, etc.) are recorded in the production and business costs of the period. In cases where it can be clearly demonstrated that these costs have resulted in an increase in the future economic benefits expected to be obtained from the use of fixed assets beyond their originally assessed standard level of performance, these costs are capitalized as an additional cost of the fixed assets.

When fixed assets are sold or liquidated, their original cost and accumulated depreciation are removed from the balance sheet and any gains or losses arising from their disposal are included in the income statement.

Fixed assets are depreciated using the straight-line method over their estimated useful lives as follows:

<u>Fixed Asset Group</u>	<u>Years</u>
Houses, structures (**)	10 - 50 years
Machinery and equipment	06 - 10 years
Means of transport (*)	07 - 10 years
Management equipment	05 - 08 years

(*): The company purchased a number of used cars, so the depreciation frame is determined according to the revaluation period
 (**): The depreciation frame of some fixed assets is determined according to the remaining time from the time of equitization of the enterprise.

Intangible fixed assets

Fixed assets are stated at original cost minus accumulated depreciation.

Land use rights

Intangible fixed assets are long-term land use rights at 1/9 Giang Van Minh, An Phu Ward, Thu Duc City, Ho Chi Minh City, which are recorded as intangible fixed assets when the Company is granted a Land Use Rights Certificate. The original cost of land use rights includes all costs directly related to bringing the land into a state ready for use. The Company does not amortize intangible fixed assets because the land use rights are indefinite.

Other regulations on management, use and depreciation of fixed assets

Other regulations on management, use and depreciation of fixed assets are implemented by the Company in accordance with Circular 45/2013/TT-BTC dated April 25, 2013 of the Ministry of Finance and Circular No. 147/2016/TT-BTC dated October 13, 2016 of the Ministry of Finance.

b) Accounting principles for financial lease fixed assets

Financial leased fixed assets are stated at original cost minus accumulated depreciation.

The cost of a finance leased asset is recorded at the fair value of the leased asset plus any initial direct costs incurred in connection with the finance lease. If input VAT is deductible, the present value of the minimum lease payments does not include the VAT payable to the lessor.

Finance leased fixed assets are depreciated based on the application of a depreciation policy consistent with the depreciation policy of similar assets owned by the Company.

CONSOLIDATED NOTES TO FINANCIAL STATEMENTS

Business Combinations and Goodwill

Business combinations are accounted for using the purchase method. The cost of a business combination is the fair value, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued by the acquirer, in exchange for control of the acquiree and, in addition, any costs directly attributable to the business combination. The assets acquired, identifiable liabilities, and contingent liabilities assumed in a business combination are measured at their fair values at the date of the combination.

The remaining difference between the purchase price of the investment and the investor's interest in the fair value of the identifiable net assets is called goodwill (the purchase price of the investment is greater than the investor's interest in the fair value of the identifiable net assets). Goodwill arising from a business combination is initially recognised at cost. After initial recognition, goodwill is measured at cost less accumulated amortisation. Goodwill is amortized over its estimated useful life of 36 months. In the event of negative goodwill (the purchase price of the investment is less than the investor's share of the fair value of the identifiable net assets), the difference is recognized in the consolidated income statement. As of December 31, 2025, goodwill has been fully amortized to the income statement.

Tax accounting principles

a) Current corporate income tax

Current income tax expense is determined on the basis of taxable income and the corporate income tax rate in the current year (20%).

b) Deferred corporate income tax

Deferred income tax is the income tax expected to be paid or recovered due to temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and their taxable values.

Deferred corporate income tax assets

Deferred corporate income tax assets are corporate income tax amounts that will be recovered in the future, determined based on deductible temporary differences, the carry-forward value of unused tax losses and tax incentives.

Deferred tax assets are recognised only when it is probable that future taxable profits will be available against which the temporary differences can be utilised. At the end of each reporting period, deferred tax assets are reviewed and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the deferred tax assets to be utilised. Previously unrecognised deferred tax assets are also reviewed and recognised – to the extent that it is probable that future taxable profits will be available against which the deferred tax assets can be utilised.

Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax is measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled. Deferred tax is recognised in the income statement, except when it relates to items charged or credited directly to equity.

Tax rate

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized, or the liability is settled. The applicable tax rate is 20%, which is the tax rate effective for 2016.

c) Other taxes

Other taxes are applied according to current tax laws in Vietnam.

The Company's tax reports are subject to examination by the tax authorities. Since the application of tax laws and regulations to different types of transactions is susceptible to varying interpretations, the tax amounts presented in the financial statements may change upon final determination by the tax authorities.

10. Principles of accounting for prepaid expenses

Prepaid expenses are actual expenses that have been incurred but are related to the business performance of many accounting periods and the transfer of these expenses to the business performance of the following accounting periods.

Prepaid expenses are amortized using the straight-line method, including:

CONSOLIDATED NOTES TO FINANCIAL STATEMENTS

<u>Cost Type</u>	<u>Time allocation</u>
Equipment repair and maintenance costs	12 months
Cost of tools and equipment (computers, printers, tables and chairs, air conditioners...) for office use	12 months
Car insurance costs	12 months
Other prepaid expenses	12 - 24 months
Long-term distribution tools (office ceiling, camera...)	24 months
One-time repair costs of fixed assets have large value	24 months

Prepaid expenses are tracked in detail by period. At the time of preparing financial statements, prepaid expenses with a period of no more than 12 months or one business cycle from the time of prepayment are classified as short-term prepaid expenses, prepaid expenses with a period of more than 12 months or more than one business cycle from the time of prepayment are recorded as long-term prepaid expenses.

11. Principles of accounting for liabilities

The classification of payables as trade payables and other payables is carried out according to the following principles:

- *Payables to suppliers: Includes commercial payables arising from transactions to purchase goods, services, and assets.*

- *Other payables: Includes non-commercial payables not related to the purchase, sale, or provision of goods and services (such as: payables for social insurance, health insurance, unemployment insurance, union funds, other payables, etc.).*

Track your payables

Payables are tracked in detail by original maturity, remaining maturity at the reporting date, by currency and by entity. At the time of preparing the financial statements, payables with a remaining repayment period of no more than 12 months or one business cycle are classified as short-term payables, payables with a remaining repayment period of more than 12 months or more than one business cycle are recorded as long-term payables.

Payables that meet the definition of foreign currency monetary items: Revalued at December 31, 2025 at the actual transaction exchange rate at the end of the period (see also Note IV.2).

Liabilities are recorded at no less than the amount payable.

12. Principles of recording loans and financial lease liabilities

Finance lease liabilities are recorded at the present value of the minimum lease payments/or the fair value of the leased asset.

Loans and financial leases are tracked in detail by entity, term, and currency. At the time of preparing the financial statements, loans and financial leases due within 12 months or the next business cycle are classified as short-term loans and financial leases, loans with a repayment period of more than 12 months or more than one business cycle are recorded as long-term loans and financial leases.

13. Principles of recognition and capitalization of borrowing costs

Recording borrowing costs

Borrowing costs include interest costs and costs directly related to the loan (such as appraisal, auditing, loan application preparation costs...).

Borrowing costs are recognized as financial expenses in the period when incurred (except for cases of capitalization according to the provisions of Vietnamese Accounting Standard No. 16 "Borrowing costs").

Capitalized borrowing costs

CONSOLIDATED NOTES TO FINANCIAL STATEMENTS

Borrowing costs arising from specific borrowings that are directly attributable to the acquisition, construction or production of a qualifying asset are included in the cost of that asset (capitalized) after deducting any income from the temporary investment of those borrowings. Borrowing costs are capitalized when it is probable that the future economic benefits from the use of the asset will flow to the enterprise and the interest costs can be reliably measured.

Capitalisation of borrowing costs ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are completed. Borrowing costs incurred thereafter are recognised as an expense in the period in which they are incurred.

14. Principle of recording payable expenses

Accrued expenses include the value of expenses that have been included in the operating expenses of the period, but have not been actually paid at the end of the financial period on the basis of ensuring the principle of matching between revenue and expenses. Accrued expenses are recorded based on reasonable estimates of the amount payable for goods and services used, including the following items: interest expenses, payable for auditing, others...

Basis for determining types of expenses payable

- *Interest expense payable: Based on time and interest rate payable.*
- *Audit fees payable, other: Based on contract and actual costs incurred during the period.*

15. Principle of recognizing unrealized revenue

Unearned revenue is recognized when the Company receives prepayments from customers relating to the following items: Prepayments from customers for property rentals. Unearned revenue allocation method: Unearned revenue is allocated and recorded in the business results of the period, based on the time and term of the amount received in advance.

16. Principle of equity recognition

a) Principles of recording owner's capital contribution

Owner's equity is recorded according to the actual capital contributed by shareholders.

b) Principles of recording undistributed profits

Undistributed profits reflect the business results (profit, loss) after corporate income tax and the Company's profit distribution or loss handling situation. Undistributed profits are monitored in detail according to the business performance results of each fiscal year (previous year, current year), and are also monitored in detail according to each profit distribution content (fund allocation, supplementing the Owner's Investment Capital, distributing dividends, profits to shareholders, to investors).

17. Principles and methods of revenue recognition

Revenue from sales of goods and finished products

Revenue from the sale of equipment and coal is recognised when the outcome of the transaction can be measured reliably and it is probable that the economic benefits associated with the transaction will flow to the Company. Revenue is recognised when the significant risks and rewards of ownership of the goods have been transferred to the buyer. Revenue is not recognised when there are significant uncertainties regarding the recovery of the consideration due or the possibility of a return.

Service revenue

Revenue from the provision of storage services and warehouse and asset leasing services is recognised when the outcome of the transaction can be estimated reliably. When the outcome of the contract can be measured reliably, revenue is recognised based on the stage of completion of the work.

If the outcome of a contract cannot be measured reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Financial revenue

Financial revenue includes: Interest on deposits, dividends and shared profits, exchange rate differences and late payment interest on coal.

Interest on deposits: Recorded on the basis of time and actual interest rate of each period.

Late payment interest: Late payment interest is based on the late payment period and the actual interest rate during the period.

Revenue from real estate transfer activities

CONSOLIDATED NOTES TO FINANCIAL STATEMENTS

Revenue from the transfer of real estate of the Company is recognized when the majority of risks and benefits related to the real estate have been transferred to the buyer, regardless of whether the legal procedures for the land use right certificate have been completed or not and the transfer contract is irrevocable. Revenue is determined reliably and the Company is able to obtain the economic benefits from this transaction.

18. Principles of accounting for cost of goods sold.

Cost of goods sold is recorded on the principle of matching with revenue. Cost of transferred real estate is determined based on actual costs incurred directly related to investment and construction of real estate.

To ensure the principle of prudence, costs exceeding the normal level of inventories are immediately recorded in the period's expenses (after deducting compensation, if any), including: costs of direct materials consumed exceeding the normal level, labor costs, fixed general production costs not allocated to the value of products in stock, inventory loss, etc.

The company did not incur any write-downs of cost of goods sold during the year.

19. Principles of financial cost accounting.

Financial expenses include: lending and borrowing costs, exchange rate losses. Interest expenses (including pre-deducted amounts), exchange rate differences of the reporting period are fully recorded in the period.

20. Selling and administrative expenses

Selling costs: Are actual costs incurred in the process of selling products, goods, and providing services, including sales staff salaries (salaries, wages, allowances, salary deductions), sales promotion, product introduction, product advertising, sales commissions, storage, packaging, and transportation costs.

Business management costs: Are general management costs, including salary costs for employees of the business management department (salaries, wages, allowances, etc.); social insurance, health insurance, union fees, unemployment insurance for business management employees; office materials, labor tools, depreciation of fixed assets used for business management; business license tax; provision for bad debts; outsourced services (electricity, water, telephone, fax, etc.); other cash expenses (reception, etc.).

21. Other accounting principles and methods

Cost of unfinished construction

Construction in progress includes the construction cost of the Trade Center in Phu Ly, Ha Nam. These projects are grouped into the construction investment cost item “Construction in progress” and transferred appropriately when the project is completed and put into use, based on the actual use of the assets.

Deferred corporate income tax expense arising from the reversal of deferred income tax assets

Deferred corporate income tax income arising from deductible temporary differences

Deferred corporate income tax income arising from unused tax losses and tax credits

Deferred corporate income tax income arising from the reversal of deferred income tax liabilities

Deferred corporate income tax expense

	December 31, 2025	December 31, 2024
	64.441.017	88.371.401
	-	-
	-	-
	-	-
Deferred corporate income tax expense	64.441.017	88.371.401

38. Basic earnings per share

Basic earnings per share is calculated by dividing the profit or loss after tax attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period.

The Company uses the following information to calculate basic earnings per share:

Profit after corporate income tax

	December 31, 2025	December 31, 2024
	4.244.806.413	3.603.487.820
	4.407.209.870	3.688.190.402
	328.000.000	-
	26.459.924	26.459.924
Basic earnings per share	154	139

(*) Average common shares outstanding during the period are determined as follows:

Average common shares outstanding at the beginning of the period

	December 31, 2025	December 31, 2024
	26.459.924	26.459.924

Average number of additional shares issued and outstanding during the period

	December 31, 2025	December 31, 2024
	-	-
	-	-

Minus: Average number of treasury shares repurchased during the period

	December 31, 2025	December 31, 2024
	-	-

Average common shares outstanding during the period

	December 31, 2025	December 31, 2024
	26.459.924	26.459.924
